“E-Jack” the Intonation Adjusting Tool for Ibanez Tremolo Bridges

- Enables easy intonation adjustment
- For Edge, Lo-Pro Edge, Edge-Pro tremolos

EJK1000

The E-Jack is a very unique and useful tool when you work on adjusting the intonation. By attaching the unit onto fine tuner and hang the clutch to the saddle, E-Jack holds the saddles firmly. You don't have to loosen the machineheads or remove the strings to unlock and move the saddle. You can easily adjust the saddle position with the dial located at the end of E-Jack. E-Jack is a great supporting tool for guitarists and techs who love the Ibanez original tremolos.

“E-Spring” the Tremolo Springs Enable Ultimate Smooth Action

- Teflon coating eliminating friction
- Normal/Power tensions available
- Comes with 3 springs/set

ESPR1003 ESPR2003

The teflon coated “E-Spring” delivers extremely smooth tremolo action with minimum friction. There are two different tensions, ESPR1003 spring and ESPR2003 power springs are available. E-Spring can be installed on almost all tremolo units, except ZPS (Zero Point System).

Picks made of Elastomer

- Made of Elastomer, which has Elasticity, Flexibility of rubber
- Finger-picking-like texture and tone

Elastomer Picks:

EL8ST10
EL8HD10
EL4ST22
EL4HD22
EL17ST10
EL17HD10

Specs

EL8ST10, EL8HD10 Triangle: 1.0mm thickness Soft/Hard
 EL4ST22, EL4HD22 Triangle: 2.2mm thickness Soft/Hard
 EL17ST10, EL17HD10 Teardrop: 1.0mm thickness Soft/Hard

An elastomer is a polymer with viscoelasticity (having both viscosity and elasticity) and very weak inter-molecular forces, generally having low Young's modulus and high failure strain compared with other materials. The elasticity and flexibility of rubber which elastomer has provides very unique tone and playing texture as if you're playing the guitar with your fingers.
